Working Papers

Works in Progress

ENSO-Driven Winter Climate Variation and Earnings Outcomes in the United States

Examines how ENSO-driven winter temperature variation affects the distribution of earnings in the U.S., shifting the focus from aggregate climate impacts to within-country labor market distributional effects.

Air Pollution and Educational Attainment: Evidence from Thermal Inversions in Nepal

This study examines whether adolescent exposure to ambient PM_{2.5} reduces secondary school completion in Nepal, combining DHS data with satellite-derived pollution measures and using thermal inversions as an instrumental variable to assess causal effects.
